**Assignment 0: Survey**

| Person ID | Problem | App/Website found | Likes | Don't like | Improvements |
|---|---|---|---|---|---|
| 1 | To edit, fill, sign PDF in one app | PDF Pro: Edit, Sign & Fill PDF | User-friendly layout with features like option to convert documents in many forms. | Sometime files get crashed while opening in app | Should work on performance and testing methods |
| 2 | Manage and remind daily routine tasks | Planny: Daily Planner | Easy to use

It manages multiple and complex tasks in one account by creating sub-tasks of a task | There is no free trial and no refund policy

Future date tasks automatically include in the current date task | Add free trial version and refund policy

The algorithm should let us add future tasks (not just for today's task) |
| 3 | Move data from phone to laptop | https://www.computerworld.com/article/3214452/android-file-transfer-how-to-move-data-between-your-phone-and-computer.html | Steps are very clear to understand so process is faster | Device version is not specified so it is not always working | Give specific steps for different device version |
| 4 | One Application in which book whole trip | Booking.com: Hotels and more | Book accommodation, flights, car rental, taxis, and all with free cancellation

Chat directly with your property provider in app | Slow during payment process and sometime not getting confirmation email

False information on app like hotel pics, false address | Try to make more secure money transaction and make it faster |
